

Attestation for Demonstration of Site Control

Attn: Manager, Generator Interconnections
Southwest Power Pool, Inc.
201 Worthen Dr.
Little Rock, Arkansas 72223

As an authorized officer, agent or representative of _____, I hereby attest that all Site Control submitted associated with the Generator Interconnection Request, known under the project name: _____, for _____ MW of proposed generation in _____ County(ies), _____ (State) meets the demonstration of Site Control requirements for initiating an Interconnection Request in the SPP Open Access Transmission Tariff (Tariff), Attachment V, Section 8.2.a or continuation of Site Control per GIA Article 11.3. The undersigned further attests that the total sum of all acreage under legal description represents _____ total acres and thereby satisfies Section 8.2.a of Attachment V of the SPP Tariff and the Site Control requirements in SPP’s Guidelines for Adding Generation to SPP’s Transmission System.¹ For reference, the table below provides the recommended acreage requirements.²

I further understand that Site Control will be considered deficient and could result in withdrawal of the Generator Interconnection Request should the following conditions exist:

- Insufficient acreage demonstrated to cover minimum requirements
- Site Control is committed to other engineering studies
- Date of Site Control documentation expires before proposed In-Service Date
- Documentation for Site Control not legally binding (i.e., not notarized, signatories incomplete)
- Site Control property description is not aligned with wind turbine farm layout (where applicable)

Printed name

Date

Recommended Site Control Acreage For Proposed Generators Within SPP Footprint ²	
Wind Generation - 30 acres per MW	Solar Generation – 6 acres per MW
Storage / Battery Generation – Mfg. Specs.	Conventional Generation – 40 acres

¹ The Guidelines for Adding Generation to SPP’s Transmission System is available here:
<http://sppoasis.spp.org/documents/swpp/transmission/studies/GuidelinesAndBusinessPracticesForGIP.pdf>

² The table provides the recommended acreage requirements, as provided in the Guidelines for Adding Generation to SPP’s Transmission System. Interconnection Customer may propose an alternative site size for SPP’s approval.
