

Request to Un-designate a Network Resource on either a Long Term or Short Term Basis

(Required for all requests to undesignate a Network Resource pursuant to SPP OATT Section 30.3)

Note: Un-designating a Network resource can only be requested for existing Confirmed Firm Monthly and Yearly reservations. A new network resource request will be required should the customer desire to re-designate the same resource prior to the end of the un-designation. The request to re-designate a network resource will be evaluated as a new request. If the “Re-designation” termination date/time is left blank it will be assumed that the termination is indefinite and the transmission will be recalled to the end of the reservation term and an entirely new application for service will be required to re-designate as a network resource . If the “Re-designation” termination date/time contains a date, the “Application to Designate a New Network Resource under SPP NITS” portion of this form must also be completed and received. A minimum of one (1) business day will be necessary to process all network resource un-designation requests for short term service.

Description of Network Resource

- a. Control Area location of Network Resource(s) if System Purchase: _____ or
- b. Identification of Generating Unit(s) (Station(s)) if unit (station) purchase or owned unit, including the Control Area(s) in which the unit is located: _____ ;
- c. Effective Termination Date/Time:

Undesignation: _____ Re-designation: _____

- d. Capacity to be un-designated: _____ MW;
- e. SPP OASIS Reservation(s) which will be un-designated: _____
- f. **(OPTIONAL)** SPP OASIS transmission service request(s) to be evaluated concomitantly with this request for temporary termination, such that the request for un-designation and the(se) related

transmission service request(s) must be approved or denied as a single request:

If temporary un-designation is one year or longer, then the concomitant evaluation will be performed pursuant to the long term transmission service study process detailed in Attachment Z1.

Requested By (signature): _____

Requested By (print name): _____

Date: _____

Company Name: _____

Please fax this completed document to SPP Tariff Administration (501) 482-2031.

If the un-designation period is six months or longer also fax a copy to Transmission Service Studies at (501) 482 - 2013

Application to Designate a New Network Resource under SPP NITS

Note: If any of the information requested on this form was supplied in the initial application for network service, please simply refer to the initial application in your response to the appropriate question.

1. Associated SPP OASIS Request Number(s)

The Transmission Customer (Customer) certifies that SPP OASIS request number(s) _____ is (are) being used to request SPP transmission service to deliver power from the Network Resource described in this Application to the applicable network load.

2. Network Resource(s) Information required by section 29.2 of the SPP OATT

The following information is provided on an attached sheet.

- a. Unit size and amount of capacity from that unit to be designated as Network Resource
- b. VAR capability (both leading and lagging) of all generators
- c. Operating restrictions during term of designation
 - Any periods of restricted operations
 - Maintenance schedules
 - Minimum loading level of unit
 - Normal operating level of unit
 - Any must-run unit designations required for system reliability or contract reasons
- d. Arrangements governing sale and delivery of power to third parties from generating facilities located in the SPP OATT footprint, where only a portion of unit output is designated as a Network Resource
- e. Description of purchased power designated as a Network Resource including source of supply, Control Area location, transmission arrangement and delivery points to the SPP Transmission System

3. Certification of Existing SPP Network Service

Customer certifies that the loads to be served by these resources are existing loads or projected forecasts of those loads served from existing connected load points identified in an existing SPP Service Agreement for Network Integration Transmission Service.

4. Contract for Network Resource

- a. Customer certifies that it owns the resource, has committed to purchase generation or Firm “Liquidated Damages” product that it is requesting to be designated as a network resource pursuant to an executed contract; or
- b. Customer certifies that it has committed to purchase generation or Firm “Liquidated Damages” product that it is requesting to be designated as a network resource where execution of a contract is contingent only upon the availability of network transmission service on the SPP Transmission System.

5. Firmness of Network Resource

- a. Customer certifies that the Network Resources do not include any resources, or any portion thereof, that are committed for sale to non-designated third party load or otherwise cannot be called upon to meet the Network Customer's Network Load on a non-interruptible basis.
- b. Customer certifies that the network resource is not simultaneously designated as a network resource for any other network customer load, including non-SPP loads and loads in SPP but not in the same control area.
- c. Customer certifies that it has reserved firm transmission service on all intermediate transmission systems, including the source system; or

d. Customer certifies that it has submitted requests for firm transmission service on all intermediate transmission systems and will notify SPP when such requests are accepted (and confirmed by Customer) or denied.
