Notice of Posting and Public Meeting

Annual Update for 2027 Rate Year

Basin Electric Power Cooperative (Basin Electric) has posted its Annual Update for the 2027 Rate Year. The Annual Update is based on historic data from 2025 and provides Basin Electric's Annual Transmission Revenue Requirement (ATRR) for the 2027 Rate Year. The costs and rates included in the Annual Update are proposed to become effective January 1, 2027.

In accordance with section II.d of the Basin Electric Power Cooperative Western Interconnection Formula Rate Implementation Protocols, the Annual Update (i) includes a workable data-populated Formula Rate Template and underlying work papers in native format with all formulas and links intact; (ii) is based on Basin Electric's Rural Utilities Service Financial and Operating Report ("RUS Form"); (iii) provides the formula rate calculations and all inputs thereto, as well as supporting documentation and work papers for data that are used in the formula rate that are not otherwise available in the RUS Form; (iv) provide sufficient information to enable Interested Parties to replicate the calculation of the formula results from the RUS Form; (v) identifies any changes in the formula references to the RUS Form; (vi) identifies all material adjustments made to the RUS Form data in determining formula inputs; (vi) provides underlying data for formula rate inputs that provide greater granularity than is required for the RUS Form; and (viii) addresses Accounting Changes. This information is posted on the SPP OASIS website on the SPP Member Related Postings page. Once on that page, click on the "Basin Electric Power Cooperative West Information" link and open the zip file. The Annual Update files are located in the folder entitled "2026 11 17 Annual Update - 2027 Rate Year ATRR." All questions concerning the Annual Update should be directed to Jeremy Voll, Senior Electrical Engineer, using the contact information provided below.

A public meeting to review the Annual Update will be held at 11 AM Central on Wednesday, November 25th, 2026. Remote access for the public meeting will be provided through Microsoft Teams. Please RSVP using the contact information provided below, indicating whether you plan to attend.
